Responses to COVID Pandemic:

Due to COVID-19 Pandemic when Government announced lockdown then most of the people faced simultaneous threats to livelihood, food and health inevitably, the impact of this situation has been most of the community that are already in vulnerable situations. The community affected from livelihood because there were no options for work due to lockdown and they were daily wages worker. After the lockdown the communities have not any idea that what they will do and they nourished their families due to lack of education. For the better situations of the country the government did many efforts and started many relief and services but a proportion of the community were unable to get basic necessity services due to lack of awareness, proper identification and documents.

During COVID-19 pandemic MSEMVS team handhold with government officials and started the relief work in 5 districts (Varanasi, Bhadohi, Mirzapur, Chandauli and Jaunpur) and did many relief work. During lockdown MSEMVS team approached with the government official for relief work and supported to community as

- Educated about COVID-19 pandemic in more than 200 villages of 5 districts.
- Provided dry ration kit to the community members who were unable to get ration due to lack of proper document, widow women, migrant families.
- Provided mask and hand sanitizer, gloves to the community members for prevention of COVID-19.

- Provided Garima Kit (Dignity Kit) to the adolescent and women who are unable to buying necessary item due to lockdown.
- Provided Cooked food to the children and widow, destitute community members.
- Mental support to the migrants families and educated the community members about COVID Stigma.
- Provided livelihood supported to Self Help Group(SHG) members/ community members for establish their business.
- Supported to the migrants for quarantine. And educated the community members about COVID stigma through wall writing, poster, banner etc.
- MSEMVS team supported relief work in more 200 communities of 5 districts.

10	Support to migrant for quarantine and educate the community about COVID-Stigma	

School Project:

MSEMVS is implementing its education project through Transitional Schools/ Remedial coaching in the community of most deprived section in the society. This project implanting in 5 districts of Uttar Praedsh.

In many villages, families struggle to find the courage to move away from forced labour, but if they see that their children can access education and stop being in forced labour, they will sustain their efforts. In many villages, our first activity is to set up a low cost transitional school/ Remedial Coaching at the heart of the Dalit settlement. Protected by the whole community, the arrival of the school is the first sign of hope for education. It is part of a wider child-centered approach, through which adolescents take the initiative and link together across the villages to spread awareness of rights and entitlements.

Preventing the children from child labour and Debt Trapped individuals is one of the main focuses of MSEMVS. More than 100 Transitional Schools/ Remedial coaching have been operated in the remote villages of Uttar Pradesh so far.

With the help of Voices for Freedom, MSEMVS have been operated 20 Transitional Schools/ Remedial coaching for the children of most marginalized section in the society.

Major Activities:

- Provide Remedial Coaching to the children of Musher/Dalit Community mainly Brick Kiln Labour family children.
- Providing Nutrition and cooked food to the enrolled children of Remedial coaching.
- Support families to enrolments and retention of the children in government school.
- Facilitating women in the hamlet to form and function the Self Help Group.
- Provide skill training to the community women and adolescent girls.
- Support to community members in accessing the government services.
- Providing micro enterprises to the community members.

- Educate and aware to the community members about the government schemes and benefits.

6	Support to community for accessing the job under MNREGA and Rozgar Camp organized with the support of government	3293 Benefited

Education, Health and Livelihood for mining affected Families:

Major Achievements -2020-201:

- Vocational tailoring training of youth was started to empower the economically, but due to CORONA-19 pandemic, training had to be stopped. Again this training started from the end of June 2020. This sewing training will be completed by 2 November. In this training, 40 youth are learning the skills of marketing bags, quilts and decorative items such as dress making and utilities.
- A batch of 20 youth completed motor driving training successfully. Those trainees also facilitated meeting with potential employers. A group of 10 youth began carpentry training in September 2020 last week. This is onsite training and trainees will learn by making wooden furniture on order.
- 10 SHGs are formed in 10 villages with 116 members. One of which is associated with SRLM. There were 102 monthly meetings with SHG members. Where he discussed livelihood activities, savings and pacnh sutra. He learned to keep his books and records. 35 leaders of the group participated in orientation training. They learned about functional groups and

starting a business. Through these, parents were approached to send children to CRRC. Motivated to 98 women have opened Jan Dhan Bank accounts

- During this COVID -19, Child Rights Resource Centers were operated by ensuring safety measures to prevent COVID-19. The small batches of the children (6-8 children) formed and educated the topics. MSEMVS team arranged the laptops, microphones and loudspeakers for making the classes possible with social distancing. The list of village children was made, who could be part of the centers, such as children who are not studying due to school closure. Averaging 8-10 new children joined the Child Rights Resource Centers. By this way MSEMVS got able to save the children from the risk of becoming child labour.
- 80 members trained on SDMC. 14 SDMC members along with the members of the Child Protection Committee put their views on the enrollment of children, retention of children in school, DBT (Direct Bank transfer) to the children and the facilities of the school infrastructure.
- In the 4 schools of the project area, the teacher has been given talks about kitchen gardening and the formation of Eco Club. And 80 children raised issues of water and established kitchen gardens in schools. 6 hand pumps installed in villages and 40 toilets being constructed.
- In collaboration with the District Mineral Fund, 2 health camps were organized in the project area. Members of 191 stone mining laborers were screened through health camps. In which fever, back pain, asthma, anemia, chest pain were treated. In which 4 people were referred to PHC for sugar, eyes disease, and tuberculosis. And their treatment is going on. Also, counseling services were provided to benefit people from health screenings, adopt healthy habits and educate families on the issue of nutrition and hygiene.
- COVID-19 had a greater impact on children. Keeping this in mind, such children were selected who did not receive MDM ration or conversion cost from the school. For this, nutrition kits (egg, milk powder, biscuits, chyawanprash) were provided to 200 children. Representatives of ASHA, Anganwadi, Panchayati raj members, women of the group and Youth Club have also been present in this distribution process. Also published through print media.
- The eco-clubs with 80 children (48 M 32F) were formed in 4 schools of the project area. Small group meetings and one to one communication done with the members of Eco Clubs. Eco Club Members made educated about the bad effects of plastic, air pollution in their area due to mining and how it is affecting their health. At the same time MSEMVS educated them about the environment and sanitation adequately. Subsequently, some activities were carried out in the village by 32 members. Approx 200 peoples were aware of the importance of using toilets, cleaning hand pumps and wells, proper disposal of waste. Also worked to protect the plants planted. Due to the

closure of the school, the work of the school garden was interrupted and it will be continued when the schools reopen and eco clubs will be formed in 4 schools.

Safe Migration in the GCC corridor.

The project is implementing 30 villages of 2 districts Mirzapur and Bhadohi for educating the communities for safe International migration the Major Activities:

- Awareness generation among the villagers about risk and rights if they go to Gulf countries for job
- Training to the volunteers in the village on Safe Tips.
- Facilitating to develop village and district level plan for making people of village / District safe from trap of unsafe migration to Gulf countries.
- Awareness and education on Prevention of Covid.
- Promoting for covid testing and vaccination.
- Support the people for accessing Govt. schemes and services.
